

PROJECT PATHFINDER

Chapter 1: *Introduction and Overview*

Thank you for your interest in N2NCU Project Pathfinder. Developed for use in Nation -2- Nation Christian University, the pathfinder plugin is designed to create and maintain custom course listings for users with a sequential progression of course completions using enforced prerequisites lockouts.

I. SITE ADMINISTRATORS MODIFY THEIR USERS COURSES AND CATEGORIES LISTING

- A. Users view their courses in an prearranged course listing.
 - 1. These course listings are generated as pathway using the pathfinder plugin.
 - 2. The recommended location for accessing the pathfinder plugin is under:
"My Home -> Site pages -> Pathfinder".
 - 3. Users are set by default to use the "global" setting.
 - 4. These changes are reflected in
 - a. Navigation --> Courses
 - b. Navigation --> Courses --> Course Categories
 - 5. The dashboard gives at-a-glance overall information of the course listing for the selected user.
- B. Site administrators will continue to view the courses and categories normally.

II. SEQUENTIAL COURSE PROGRESSION WITH COURSE-COMPLETION PREREQUISITES

- A. Course-completion prerequisites
 - 1. Users who attempt enrollment will have their course completions compared with their prearranged pathway listing.

- 2. If there are any courses that are not yet completed, the course name and id are listed with a request to complete the courses.
- 3. Enforced lockouts for the enrollment plugins self-enrollment and PayPal.
- B. Either the self-enrollment or PayPal enrollment will be listed during the course enrollment, and not both, which is based on the profile of the user account.

III. PAYPAL ENROLLMENT

- A. Requests payment for the enrollment of the first course in each category.
- B. Enrollments into courses listed after the first course in the same category are allowed to enroll without payment.
- C. Users have a hidden "year_prepaid" flag in their profile, which if checked, allows the user to enroll in courses listed in their prearranged pathway.
 - This flag is removed on successful enrollment of the last course in every third category
 - Collection on payments resumes during the enrollment in the first course every fourth category.

PROJECT PATHFINDER

Chapter 2: Getting Started

Users can view their course listing designated by the pathfinder plugin. The course listing for all users default to "global" whenever a course listing has not been setup for a particular user. Existing user course enrollments are still valid and available to the user, even if the course is no longer listed.

I. COURSE LISTING WITH PATHFINDER PLUGIN

A. Set up a course listing for "global"

1. Select the user profile "Global" and click on the button labeled "Load User".

2. Select the course listing and "save changes".

B. Set up a course listing for User ID:

1. Select the user profile and click the button labelled, "Load User".

2. Select the course listing and "save changes".

C. Removing an existing course listing

1. Modify the course to "---Choose a course---" and "save changes".

D. Removing course listing for User ID: ### to default to "Global" course listing

1. Modify the entire course listing to "---Choose a course---" and "save changes".

PROJECT PATHFINDER

Chapter 3: Current Limitations

I. CURRENT LIMITATIONS

A. Pathfinder Plugin

1. Modifying course listing for users can only be changed by site administrators.

B. Courses

1. "Global" or per-user based accounts in Pathfinder are currently limited to six (6) courses per category.
2. The course listing for all users default to "global" whenever a course listing has not been setup for a particular user.
3. Existing course enrollments are still available to the user, even if the course is no longer listed.

C. Categories

1. Course listings are loaded into course categories id# linearly.
2. Categories that are hidden are not visible to users with "global" or per-user based accounts.
 - ie: Category "Semester 3 - Core Course" is hidden.

Users who have courses listed under "Semester 3 - Core Courses" will be hidden from their view. This includes the "global" course listing.

PROJECT PATHFINDER

Chapter 4: Technical Information

I. TECHNICAL INFORMATION

- #### A. PHP functions are stored in:
- moodle/mod/pathfinder

- #### B. Database tables for the pathfinder plugin are stored in:
- mdl_course_pathway

C. Files modified:

1. moodle/mod/pathfinder
 - a. lib.php
 - b. view.php
2. moodle/lib
 - a. navigationlib.php
 - b. coursecatlib.php
3. moodle/blocks/completionstatus
 - a. block_completionstatus.php
 - b. details.php
4. moodle/enrol/self
 - a. lib.php
5. moodle/enrol/paypal
 - a. lib.php
 - b. ipn.php
 - c. enrol_year.html
